Thrilled to share that the paper: ***PRISM: A Framework for Multi-Level Modelling and Analysis of Polarisation Knowledge***, co-authored by **Demetris Paschalides** and **George Pallis**, has received the **Best Paper Award** at the **16th IEEE International Conference on Knowledge Graphs (ICKG-2025)** on 13 November.

This achievement builds on work supported by **ATHENA** and contributes directly to the foundations of **WP2**.
